Bemis Healthcare Packaging wins Flexible Packaging Association Silver Achievement Award for Technical Innovation in Development of the Lidocare Pouch

Oshkosh, Wisconsin, March 2, 2017 – Bemis Healthcare Packaging has been awarded the Flexible Packaging Association Silver Achievement Award for Technical Innovation in the development of NFI/UPM Pharmaceuticals' Lidocare Pouch. This pouch is manufactured using PerfecPharm™ P616 that incorporates Bemis® CXB™ sealant. This award was accepted by William Jackson, Senior Vice President & CTO for Bemis Company, Inc., during the 2017 Flexible Packaging Achievement Awards Ceremony & Welcome Dinner on March 1st.

“We are proud to receive this technical innovation award and recognition from the FPA for the development of this high barrier pouch, engineered to package and protect the Lidocare™ Pain Relief Patch,” says Georgia Mohr, Pharmaceutical Marketing Director for Bemis Healthcare Packaging. Bemis® CXB™ sealant in this foil lamination provides low drug uptake and high barrier properties which are critical for the packaging of Lidocaine Patches.

Ms. Mohr adds, “PerfecPharm™ P616 provides outstanding chemical resistance to lidocaine and the other chemicals present in the transdermal patch formulation. Bemis® CXB™ sealant contributes to maintaining the efficacy of pharmaceutical products and is a leading product in our transdermal packaging portfolio.”
